

Electro-Optic Amplifier

EOA-01

APPLICATIONS

Broadband, high frequency amplifier primarily designed for use with electro-optic modulators.

DESCRIPTION

Electro-Optic Amplifier for amplification of signals up to 150MHz with a 20dB gain. A 1V peak to peak input will produce ~ a 10V output signal which can be used to drive the Photonics Technologies Electro-Optic Modulator, EOM-01. BNC input and output connectors for easy use with most optical equipment.
